## EXPERIENCE

**Aquarian Healthcare Solutions**                           **October 2014 – Present**
*Director, Supply Chain*

- Responsible for developing specialized technology solutions for potential and existing customers through the evaluation of the customer's needs, and presenting recommendations in a clear and professional manner.
- Regularly meets with Supply Chain, Information Technology, and Operations executives to develop roles and responsibilities as well as facility specific action plans for implementation of new technologies and inventory control practices.
- Identifies technology trends and updates and communicates them to customers to continue to provide value after the initial implementation is successfully completed. Advises Supply Chain Executives on the features outside of their current technology packages, and demonstrates why each would bring value.

**Target Corporation**                                  **May 2012 – October 2014**
*Executive Team Leader of Logistics*

- Scheduled product deliveries to run a JIT process to eliminate excess inventory through forecasting based on projected sales and consumer trends.
- Managed system reports to analyze areas of opportunity and recognize areas of strength to continuously improve overall process.
- Developed a strong team by ensuring proper training and certifications were completed so that all employees worked efficiently.
- Managed an ever-changing environment through clear communication and direct action plans to maintain productive under any circumstance.
- Recruited, selected and developed talented employees to continuously improve the Logistics process.
